

# eSignature Powered by DocuSign

Securely Sign Legally Binding Documents – Within the Avetta Connect™ Platform

Manually signing client-supplier contracts is an error-prone and tedious process. Inefficiencies in tracking what document was signed and who signed it raises concerns about whether these documents would be legally valid and admissible in a court of law.

Avetta's eSignature empowers you with legally binding document signing and legal document workflows. Bringing suppliers into your network becomes even easier and more secure. You can send, review, sign, and track any type of document from within the Avetta Connect™ Platform.

## How it Works

01  
Talk to your Account Manager to enable eSignature for your account.

02  
Apply rules and configuration specific to your business needs and send corresponding documents to a supplier for signing.

03  
Supplier assigns a signing authority and triggers the eSignature process. The signing authority follows the process.

04  
The signed document is saved in Avetta Connect™ platform for both Clients and Suppliers.

## The Benefits

### Ease of Use

Eliminate manual documentation work and sign all your document within minutes.

### Ensure Compliance and Reduce Financial Risk

Create court-admissible documents and ensure complete audit trail.

### Enterprise-grade Security

Secure your documents with some of the most stringent U.S., EU, and global security standards.

### Seamless Integration

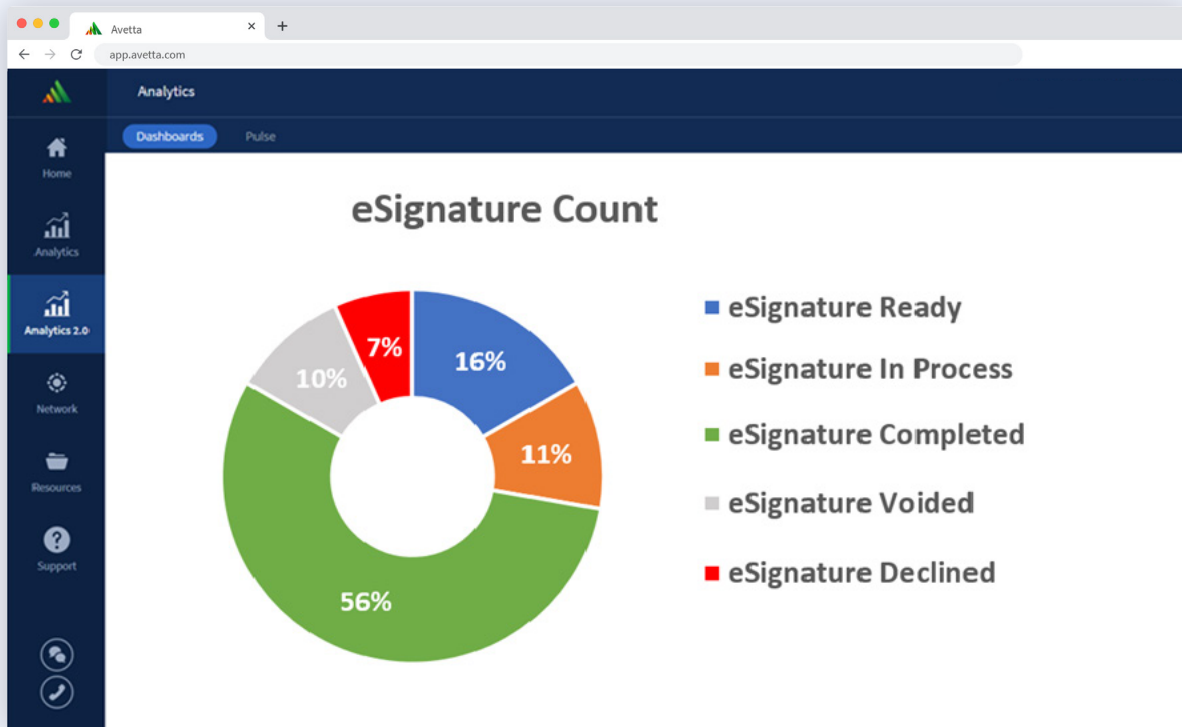

Configure and apply eSignature workflows without leaving the Avetta Connect™ interface.

### End-to-End Document Visibility

Gain complete visibility into document statuses during the entire eSignature workflow.

# The Capabilities

## Compliance Adherence

Drive compliance or non-compliance through eSignature workflows and statuses.

## Signer Authentication

Enable suppliers to authenticate the signing authority for enhanced security.

## Alerts and Notifications

Notify suppliers weekly via email on any open eSignature tasks.

## eSignature Snapshot

View signature statuses for all your suppliers at a glance through near real-time dashboards.
